

"Working with graphic designers is not always the easiest part of web development. It can be difficult getting a designer who has vision and creativity but can still deliver professionally and to a timeline."

"We have never had this issue with Lagrafica and it makes doing business a pleasure. We have used Dan's skills both internally for ourselves and also for our clients. It is great to have a creative yet professional resource at our fingertips."

"This is the reason we will continue to use Lagrafica in the future and wouldn't hesitate to recommend others do the same."
